

CAUSEVEST

Causes Guide

Causevest is a new type of participatory budgeting blockchain network that gives people the power to redirect network profits to good causes in a sustainable way.

Why You Matter To Causevest

You matter to Causevest because we want you to do well and be successful in all that you endeavor, especially if that success involves having a positive impact on the lives of others!

The more causes that join our network, the more powerful our network becomes and the more people we can help.

With your help we can change the very concept of money so that more of it is directed to people like you who have a positive impact on the world we live in.

About Causevest

Causevest is an altruistic network of people. It involves a mixture of groups working together around a set piece of technology which operates based on the directions of its coin holders who hold Causevest Coins (XCV).

Causevest wants to help as many people as possible, and the people with coins decide where the capital in the network goes to.

Causevest currently has:

- A donation platform which you can use to raise capital.
- An app allowing donors to vote for and interact with causes easily
- A broker network, which enables you to convert different types of cryptocurrencies and fiat money into your local currency without the need of a bank

So What Is A Cause?

A cause is anything that you believe needs to be supported. It can be an individual, institution, community, musician, artist, charity, or simply anything that other people are inspired by and believe in. The only restriction is that you're not expecting profit from your support. In the case of Causevest, a cause is something that a coin-holder has identified as deserving of capital by donation of funds. Once a donation is made to a cause, the network sees this as a signal and sends additional funds towards the cause or rewards people who assist that cause in raising funds.

No Blockchain Knowledge Necessary

You don't need to understand anything about cryptocurrencies or blockchains to make use of our platform. You can go on the platform, register, and receive everything in your local currency. We allow you to receive donations in a wide range of different currencies.

The platform itself handles all the interactions with the blockchain on your behalf so you can raise money and get support from your community with peace of mind.

We do however encourage you to learn about our technology. It is imperative that more causes and charities move away from traditional financial services and into cryptocurrencies using coins like (XCV) Causevest Coin.

If you want to have a positive impact on the world and actually help people, then the type money you use sends a clear signal and has a deep impact. **The fact that you use fiat currency means that for all the good you're trying to do, you're still part of the problem** and we want you to become part of the solution.

Getting Started As A Cause

1. Register on the Causevest donation platform www.causevest.io or coin site ico.causevest.io
2. Create an account/wallet, advertise for capital, notify people that they can support you in a variety of ways and then claim the funds that have been donated to you.
3. People may have raised money on your behalf, with you unaware of it. When you come onto the platform you will be able to claim campaigns linked to your cause as a beneficiary.

Ways To Obtain Funds

1. Raising money directly
 - a. putting an advertisement on the platform
 - b. Getting people to view your advert by telling the world about it (blog, social media, etc.)
2. Collecting money that operators have raised for you
 - a. Local fiat currencies (dollars or pounds)
 - b. Convert Cryptocurrencies into any currency you want
3. Getting money sent to you from the network
 - a. Receive XCV from the network towards your registered and validated cause
 - i. Obtained via transaction fees and XCV market purchases
4. Fulfilling Donor covenants
 - a. Some donors can make requests alongside their donations if you fulfill these their funds are released to you

What We Expect From You

We have built this entire ecosystem just for you its community driven and we just have 3 little requests

1. **Support Your Cause:** Raise funds, vote for others and get supporters to support you via our platform.
2. **Spread the word:** Tell people about the coin, about the Causevest platform and encourage them to join our movement
3. **Use the coin:** If a supplier, produce or shop accepts XCV and you have XCV complete the transaction in XCV these transactions are what generate the fees we donate to good causes like yours in the first place.

What You Can Expect From Us

1. **Absolute commitment:** We are committed to doing our best to help you succeed we are not just a passive platform. If we can drum up support for you we will and if you get support our network will back you with more.
2. **Innovative technology:** We have worked hard to provide technology that's unique , powerful, easy and fun to use.
3. **Feedback Lovers:** We are keen to learn and constantly improve so please never hesitate to send us your feedback.

Working Directly With Our Blockchain

Non-platform operations:

When a cause (or a cause) interacts with our protocol enabling them, to raise money for their cause without needing to access our platform this is a non platform operation. You can read more detail in our white paper

Here are the steps to do everything described earlier in a fully-decentralized environment (without the platform):

- Download the client wallet
- Create a donor wallet
- Advertise to receive funding to your donor wallet
- Have someone send XCV into your donor wallet, which counts as a donation and is recognized by the network, making you eligible for some of the transaction fees that go across the network and into your donation as well
 - we will “top up” the funds you receive on the network

Platform Features

- Validation of your causes
- Enables operators to confirm cause validation (similar to validation for mining)
 - Once a certain number of Operators have confirmed that your data is valid, additional funds can be released from the Causevest network to your donation or beneficiary wallet.
- Ability to find and source all wallets of linked causes into one place, so that you can receive donated funds as a beneficiary
- Uploading all data into our archived nodes
- Unloading any smart contracts/covenants (which release more funds to you as a beneficiary) that can only be accessed once you've uploaded all data proving you satisfied the criteria of the donor

Our platform will not be the only platform you can do this on. Other platforms will be able to use our technology to reward donors and trace cause actions but in the very beginning, our platform will be the first available for you to operate on.

Beyond our platform

When causes upload audit data this is stored on our blockchain it provides live evidence that you actually use the funds you receive for what they were intended to do.

We have many features to protect our network against fraud and ensure that more of the funds go to good causes that really want to have a positive impact

We try to have as many causes validate (KYC) themselves as possible.

What is Cause Validation?

Obviously, there are limits to what you can do on the network. We give more bonuses to causes that are validated on our network, and to validate, you have to upload your details through the platform. That doesn't mean that you can't raise money via the protocol, but it does exhibit our efforts to reduce the amount of "bad actors" in a network who may try to take advantage of a quasi-decentralized system. We have elements of governance (validation), but we still give you the freedom to do as you like—a core principle of decentralization and the blockchain.

Even without validation on the protocol basis, there are still some security features, such as Proof of Forgiveness payments, that help to stop "bad actors." Additionally, it is possible for people to receive funds for causes and stay anonymous, and that's one of the advantages of using the platform.

If the transaction is made off-platform, it's down to the donor to trust that the person trying to raise that money is who they say they are. There will always be "bad actors" around who try to cheat the system, but we will do all that we can to mitigate their attempts and reward people who act honorably.

Who Checks All of the Data?

Operators check everything. This checked data includes the charity information of the cause and whether the charity has received their funds. In return for their work, operators are rewarded when you receive the capital they have raised for you. This incentivizes operators to make sure that charitable causes get the money they deserve.

Join The Causevest Community!

Please be sure to join our community. If you join our Discord group, you will be able to speak to some of the Operators (people who are helping you raise money) and the Development team directly.

You can join our Telegram group if you are curious to learn about our actual cryptocurrency, the market around it, and the community that's being built in regards to the sales aspect of what's going on with our project.

Join our forum if you want to join people who are interested in Causevest and get involved with community discussion.
